PROJECT PIPELINE

is a summer camp program created by The National Organization of Minority Architects to educate minority youth about the process and impact of architecture in our communities. With camps held by chapters across the country, Project Pipeline provides kids a unique opportunity for exposure to the fun and exciting world of architecture + design.

CAMP Sustain.Ability is PhilaNOMA's Project Pipeline program for middle school students focusing on **sustainable architecture + design**. Our workshops are administered by architecture professionals and college students who volunteer their time in order to teach, mentor and inspire our camp participants.

During camp, your student will learn about the architectural process, design their own studio project, build models, take educational trips, and make new friends!
